This man was seen by Frank W.

she had been seen to hesitate as if wavering in her decision to accom-pany him. The girl, the photograph-

she had gone for a pair of skates she

had left to be sharpened, that Ruth Cruger was last knewn to have stop-ped on February 13. The time she

was said by Cocchi, who has since dis-

Mr. Markham did not achieve a national reputation until he was forty-seven years old. He was a school master and school superintendent up to that time, but always a poet.

"The mouth of the Chesapeake," said the speaker, "one of the most im-portant waterways strategically, is absolutely undefended, except for mines which might be planted. A hostile fleet could pass in and out with impunity and spread its forces along the line I have named."
The line he had named earlier in his talk included Baltimore, Pittsburgh

and Erie. Continuing he said: "In the section to the north and eas there would be 25,000,000 people, 85 per cent of our steel plants, 97 per cent of our powder factories, the National Capital, our one naval gun fac-tory and our greatest cities. Of what use would be an army of 10,000,000 men if they had not the weapons to fight with?

Mr. Huldekoper denounced the State militia in the following terms: "The national guard must have been named so by way of a paradox; it is neither national nor a guard. The flasco down on the Mexican border showed that. A recent report of the Army War College shows plainly it is made up of raw, untrained men, who, for the most part, can't even

GASOLINE BURIED 20 YEARS. SPARTA, Wis., Feb. 25,-Workmet naking evacuations at the Normal School came across a 1,000-gallor tank of gasoline. How and when and why it was buried was a mystery at first, but later some old timers remembered that a score or more of years ago the institution used gasoline and it was purchased in large quantities at a low price. As a safety-first measure the tank was buried to guard against explosions.
